Reading Strategies

Predicting:

Look at the front cover of the book. Use the title and the pictures to help you guess what the story might be about.

Share your thoughts with someone at home.

Visualising:

As you are reading, try to visualise yourself as the main character. What would you see, hear, taste, smell and feel?

Fill out the Y chart to describe your visualisation.

Connecting:

Make a connection between the text and either yourself, the world or another book it reminds you of. Complete the making text connections worksheet.

AMAZING ANTS!

Ants are amazing insects! There are thousands of different species of ants. They can be found all over the world, except in Antarctica.

Where Do Ants Live?

Ants like to live with other ants in large groups called colonies. Ant colonies may live in underground nests, inside trees, or even in the walls of a building.

What Jobs Do Ants Do?

Ants are hard workers. They work very well as a team. Different types of ants do different jobs in the colony.

The queen ant is the boss. She lays eggs so that the colony keeps growing. The male ants help the queen ant to make the eggs. The female ants are the workers. They build tunnels and collect food for the colony.

What Do Their Bodies Look Like?

Ants have a head, a thorax and an abdomen. They have six legs, two eyes, a mouth and two antennae. Ants do not have ears. They feel vibrations in the ground through their feet. Some ants have wings. Ants use their antennae to follow a scent trail, to taste and to communicate with each other.
